

**GIMS (Pty) Ltd**

Reg. No. 2017/517203/07

## **GIMS Vision**

Simplifying decisions, making a difference, through spatial awareness.

## **GIMS Mission**

Organising, integrating, and analysing spatial information through innovative Geographic Information Systems technology, making it accessible enterprise wide for advanced decision making.

GIMS has been a supplier for Esri South Africa for the Esri ArcGIS product range in eSwatini, Lesotho and Mauritius since 2021. They have established themselves as the leader in GIS technology over the past few years, with a close association with Esri South Africa.

As an Esri South Africa supplier and partner, GIMS has successfully forged lasting relationships with GIS technology users in Southern Africa and we continually strive to be of similar value to our new and potential users. It has been extremely rewarding to see our valued customers grow from desktop users to advanced server and enterprise users.

At GIMS we believe that the implementation of GIS technology can make a positive difference to the quality of peoples' lives in Africa. Even though we are a technology-based company, we value personal relationships and endeavor to provide a professional and personal service to all our clients. GIMS builds on a talented and highly effective staff pool through training and development, as well as access to Esri South Africa resources and facilities.

As part of GIMS's strategy to be the Esri ArcGIS technology leader in Southern Africa, the company invests heavily in Research and Development and ensures that employees are on the forefront of technology. GIMS focus is to deploy the latest technology within organizations operating mission critical systems, such as Lesotho Land Administration Authority, Regeneration of Landscape and Livelihoods and Lesotho Highlands Development Authority amongst others. GIMS has also implemented projects in eSwatini such as eSwatini Sugar Association and eSwatini Water & Agriculture Development.

As an established GIS company, clients can rely on GIMS's reputation as a stable, knowledgeable, and supportive GIS technology provider!
